Thank you for choosing Condamine Veterinary Clinic for your enquiry about desexing your pet.

This is a very important decision for you to make.

We offer three packages for your pet in order to meet the needs of all of our clients.

Our first level is our ***SAFETY AND COMFORT***. This *premium* pack is chosen by most of our clients as it is the safest, most superior package for their pet. Pets having this level of care will receive:

- Comprehensive clinical examination by the vet after arrival Pre-anaesthetic blood tests that check vital organ function before anaesthesia which allows us to plan for the safest anaesthetic
- Premedication with an opiod which provides strong pain relief and helps your pet relax and be comfortable while in hospital
- Intravenous fluids which maintain blood pressure and improve anaesthetic safety and recovery from surgery
- Another pain relief injection after surgery that lasts 24 hours
- Take home pain relief and antiinflammatory medication for a few days to keep your pet comfortable and speed up recovery
- Heated anaesthetic delivery tubes to improve safety
- Heated cocoon to keep your pet warm and comfortable during surgery and speed up recovery
- Heated recovery cages
- a dedicated anaesthetic nurse to keep you pet safe during and after the procedure
- sterile surgical kit
- No extra fees if patient is overweight or early pregnant
- removal of deciduous teeth if required
- desexing tattoo
- nail trim
- and more

The **SAFETY** is our next level down and is also very popular with many of our clients. It is a very safe package that includes many of the features listed above in particular superior pain management and intravenous fluids but it does exclude the pre anaesthetic blood testing and the heated cocoon bed.

The **PREMIUM ECONOMY** is still a very safe option. It includes a superior pain relief before and after surgery. It does not include the blood tests or intravenous fluid therapy nor many of the other features available in the top 2 tiers.

To book your pet in for desexing or any more information, just phone **4667 1176** and our nurses will organise everything for you.
